MICROSOFT OFFICE 365

Is your business interested migrating your email and data to cloud-based mail and storage? Needing to integrate and migrate Microsoft's business email and file storage, business communication software or Microsoft Office solutions? THUMBTECHS is your business partner and proud Microsoft solutions expert and leading partner serving the Fort Worth and Dallas area.

CLOUD SERVICES/SOLUTIONS

How can small-to-medium-sized businesses take advantage of the time-saving aspects and productivity increases that cloud-computing delivers? Cloud services can include dedicated backups, desktop/server antivirus, email and file storage solutions, hosting and office web applications. THUMBTECHS can assist your business in saving equipment costs and security, protection and productivity, and deliver a custom-fit solution for your business.

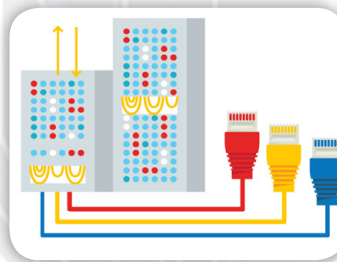

NETWORK SECURITY PROTECTION

The vulnerabilities of today's business lies primarily with the accessibility and data and hardware intrusions. From every day harmful viruses to invasive and malicious hacking of networks to the possible denial of service attacks from external sources. The right balance includes a well thought out plan that includes safe accessibility and vigilant monitoring and protection. Talk with one of our THUMBTECHS network security experts today.

PHONE SYSTEM SOLUTIONS

Years ago, business communications stopped at your desktop's handset for telephone services. Zultys has revitalized what it means for inbound and outbound calls at the office and we're proud to announce we've teamed up with a phone solution that is both cost effective and efficient. Zultys brings you affordable feature-rich VoIP Business Communications that integrate your office phone with mobile devices including phones, tablets, and computer desktops to work seamlessly on one unified communications platform.

CABLE AND FIBER SOLUTIONS

THUMBTECHS also provides network infrastructure for our SLA clients, including structured cabling, telecom implementation services, design, and certification. Proper deployment of wireless services to increase mobile workforce access to critical applications that takes advantage of emerging technology to minimizing time and manpower requirements. We provide complete planning, design, integration and overall support customized to your business cabling objectives.

DEDICATED SUPPORT PERSONNEL

Our dependable IT support staff will know you by name and be in tune with your daily network and operational needs. This ensures improved network reliability as well as increased productivity and stability for your business. Our personnel are certified and experienced to solve your I.T. problems. Additionally, our online case management and dispatching systems allows us to track, store, and retrieve every open or closed case from your company's network history.

DATA BACKUPS

Your business' data is one of your most valuable assets. Protecting your critical information, backing it up regularly and planning for a disaster recovery plan is essential. Knowing that your data is safe, secure and can be restored are just a few of the issues that your THUMBTECHS technical support staff will assess with you in detail. We are here to assist you in planning and developing a reliable disaster recovery plan for the future of your business
